

## PRICES INCREASE

The A2013 sale was characterised by very strong demand for virtually all types, as a result of very buoyant International market and extra competition provided by the participation of an additional buyer.

The composition of the 42,716 kg offering was somewhat mixed in quality, however it was very encouraging to see a larger quantity of 'B' length fleece types compared to the previous sale.

### PRICE TRENDS

Fine kid prices were 26 to 32% above the levels offered (and rejected) in November

GOOD kid was up 8 to 11%, Strong kid was up 15 to 19% , GOOD YG was up 15 to 23%

BFFH was up 29%, whilst stains and cots were very significantly higher. Micron is still very much the major price determining factor . Price trends are very positive for mohair under 31/32 micron. The high sale clearance rate of 99.8% plus a significant rise in average price to approximately \$11.50 is indeed a very good indication of a turnaround for our industry.
