

Australian Mohair Marketing Org Ltd – Market Report

Sale Date 23 Sept 2011.

Sale offering 45,989kgs – 240 Bales in 52 Lots – 98.8% sold

Average Price \$10.92 3 Unsold lots (555kgs) were grower lots.

The back drop to our most recent sale was a very difficult trading environment brought about by a unstable and volatile South African currency. The negative effect of the volatility of the Rand also impacted on the Cape sale held on 27 Sept.

In light of the afore mentioned economic factors, it can be said that AMMO has still been able to achieve a good result, especially when our prices are compared to those achieved at the Cape in the sale of 27 September, and also to the prices achieved for the same sale last year (ie Sept 2010).

At the completion of the post auction negotiations with buyers, the clearance rate of 98.8% (100% of pooled lines) was a pleasing result. The sale average of \$10.92 in a difficult economic climate should be well received.
